

Standard for First Aid Kits

In June of 2015, the American National Standards Institute (ANSI) and International Safety Equipment Association (ISEA) approved an update to the ANSI/ISEA Z308.1 Standard: Minimum Requirements for Workplace First Aid Kits and Supplies. The new standard includes two classes of first aid kits, based on the assortment and quantity of first aid supplies. Class A kits are designed to deal with most common workplace injuries, such as minor cuts, abrasions and sprains. Class B kits include a broader range and quantity of supplies to deal with injuries in more complex or high-risk environments.

Class A and B First Aid Kits

Required Item	# Required for Class A	# Required for Class B
